File Status

File Stat

A display of User File Status can be obtained by selecting Function, "STATUS", Sub-Function "ONLINE DISPLAY" ("T1") from the Additional Functions Menu. Selection of this Function results in:

- Replacing of the Additional Functions Menu by the File Status Screen (Figure 17.1).

- The disappearance of the cursor

This is a DISPLAY ONLY Screen. Only the Help/Display/Return/Exit Function keys are available. You must press a Function Key to select an Option. If you press any key other than a Function Key, the PC speaker will BEEP.

Re-display File Status (F7)

Selecting Option "Re-display" (F7) results in a re-display of the file statistics. If you are running from a workstation on a network, the record counts may change based on other user activity on BOOMS.
